### Letter of Recommendation

To whom it may concern,

I am very pleased to write this recommendation on behalf of **Clief Sengkey**. I have known him since year 2011 when I was assigned his thesis project supervisor on undergraduate program at De La Salle University, Manado, North Sulawesi, Indonesia. For your information, I am from Institut Teknologi Bandung, a few years ago I was asked by the university to be the supervisor for their students, one of the students is **Clief Sengkey**. His thesis was developing a mobile application of tourism information in North Sulawesi.

I rate him as a highly motivated and hard working person and was enthusiastic about learning the something new. As far I know he did not encounter many obstacles of academic nature in completing his undergraduate degree at his university. He recieved his bachelor's degree with very satisfying results. Apart from being an academically competent student, I also find him to be a friendly and sociable person.

I highly recommend him as a participant in your Graduate Program. I am positive that he will be able to attend the program in the stipulated time and the results will not be disappointing. If you would like to know more about **Clief Sengkey**, please feel free to contact me.

Bandung, January 28<sup>th</sup>, 2018  
Yours truly,

**Dr. Rinaldi Munir**

Associate Professor

Laboratory of Computational Science and Engineering

Informatics Engineering Department

Institut Teknologi Bandung
